## FLS FACE SHIELD

Face shields offer a comfortable means of protecting the face, including the eyes, nose and mouth from splashes, sprays, and splatter. There are numerous advantages associated with wearing a face shield including the possible extension of the useful life of a protective face mask when worn at the same time.

The shield extends from the eyebrows to below the chin and across the width of the user's head so, a large portion of the face is protected. The elastic headband is attached to the shield using plastic fasteners providing a secure fit and ease of donning and removing the shield. The polyurethane foam provides a comfortable fit and allows for the use of other protective equipment.

Material	Requirement	Dimensions	Comment
Clear TransPet® AF2 Clear 0.020 Lexan(alternative material)	1	230mm x 380mm (9" x 15")	<ul style="list-style-type: none"> <li>TRANSPET® AF2 is a clear polyester film coated on both sides with an anti-fog coating. AF2 is typically used in face shields, masks, visors and other industrial use. Refer: <a href="https://www.transcendia.com/products/af2">https://www.transcendia.com/products/af2</a></li> <li>Alternate material: Clear 0.02" Lexan. Lexan is a polycarbonate material, which is tough, impact-resistant, virtually unbreakable material used in wide variety of applications.</li> </ul>
PU Foam 1.2pcf 30mm	1	25 mm x 254 mm (1" x 10")	
Double-sided tape	1	25 mm x 355 mm (1" x 14")	Width of elastic band may be 19mm (0.75") depending on availability of 25 mm (1") elastic
Plastic snap fastener T5	2	20mm
